- 13: RSA NOVEMBER 2023 INFLATION RELEASE

WHAT TO EXPECT

Due to a strong finish of the third quarter of 2022, a significant improvement in growth can be seen in the South African economy and expectations for 2023. This will in turn boost the final quarter's activity and spill over into the new financial year, aiding the country to continue rebuilding what was lost due to the pandemic.

Another big growth opportunity is presented for Africa as a whole with regard to oil and food exporting as other popular exporting countries' trade grows slower
